

# Early Childhood

## Preschool Enrichment Program (2-4 years)

This Early Childhood program is designed to provide children with quality learning experiences through age appropriate activities that will foster each child's social, emotional, physical, and cognitive development. Activities are structured so children can interact with classmates on an individual basis as well as within a group. Creativity is encouraged through songs, music, books, and art. Self-confidence is promoted through independent play. Large motor skill activities are incorporated into the program by exploring the outdoors and through physical play within our enclosed playground. Small motor skill activities include cutting, coloring, tracing and more. Free choice play learning stations include science, dramatic play, large and small blocks, computers, and literacy activities. A nutritious snack is provided half way through the class. **Registration is ongoing.**
